SPRING BLOOMS

Five neighbors are beginning to plant their spring flowers. Each person (Gabe, Hermione, Isaac, Julio and Kate) lives in a different colored house and plants a different flower in their front yard. Using the clues determine who is planting which flower, the color of the house they live in and the house number (2, 4,6,8,10)

- The five people are: Hermione, the one who lives in a white house, the one who lives in house number 4, the one who planted pansies and the one who lives in a yellow house.
- The number of the house where lilies were planted is twice the number of the blue house.
- Kate lives directly between Isaac's house and the red house.
- Gabe did not plant irises nor does he live in the red house. He does live in house number 8.
- Hermione lives in the red house; she planted petunias.
- Of house number 10 and the house where Kate lives, one is blue and the other one is where the irises were planted.
- Isaac lived in house number 2. Gabe lived in the white house.
